# Pressure area care with a lighter touch on NHS budgets

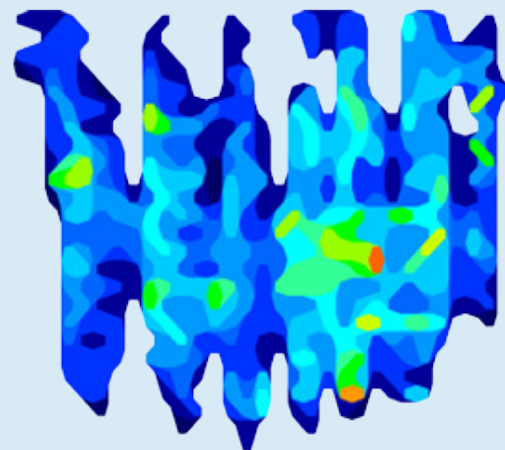

**During sitting, it has been estimated that as much as 75% of body weight is taken through the sacral area, which can lead to significant pressure damage.**

Prevasse is an aid in the prevention of pressure ulceration for all patients including those assessed as high risk, and for the treatment of existing category 1 and 2 pressure ulcers<sup>1</sup>. Clinical supervision is advised if damage is severe. Prevasse may be cleaned and reused for multiple patient use.

**Front of Cushion Without Prevasse**

**Front of Cushion With Prevasse**

Average pressure reduction across the cushion = 44%

## **The Prevasse may be cleaned and reused for multiple patient uses:**

- Transportable and lightweight solution for static chairs
- Transportable and lightweight solution for compatible general purpose wheelchairs where securing in place with the strap is possible
- Easy to clean for multi-patient use
- Suitable for both Acute and Homecare settings

Two inflated sizes available:  
Large - 52cm x 52cm  
Small - 46cm x 46cm

Prevasse hand pump

Prevasse is a pressure redistributing cushion and is ready to use straight out of the box.

## NICE Guidance Pressure ulcers: prevention and management

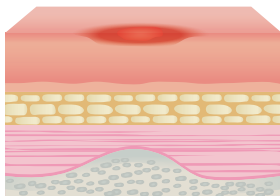

- Clinical guideline [CG179] Published date: 23 April 2014
- Pressure redistributing devices
- 1.1.16 Consider the seating needs of people at risk of developing a pressure ulcer who are sitting for prolonged periods.
- 1.1.17 Consider a high-specification foam or equivalent pressure redistributing cushion for adults who use a wheelchair or who sit for prolonged periods.

### Seat Cushions

Seat cushions play an important role in 24 hour care, ensuring that vulnerable patients are not at risk of pressure ulcer development when they are in a seated position outside the bed, in a chair or a wheelchair.

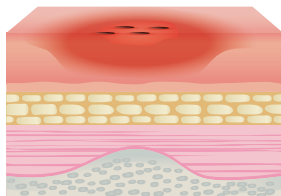

Prevasse is a proven aid in the prevention of pressure ulceration for all patients including those assessed as high risk and for the treatment of existing category 1 and 2 pressure ulcers.<sup>1</sup>

#### Category One

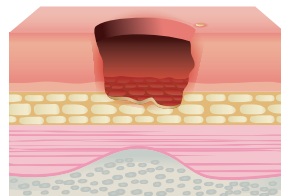

Nonblanching, unbroken skin that may appear red or violet.

#### Category Two

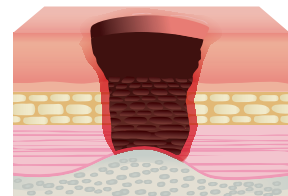

Skin breakdown as far as the dermis.

#### Category Three

Skin breakdown into the subcutaneous tissue

#### Category Four

Penetrates muscle, tendon and bone.
